-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 7, 24, and 25 are drawn to power control apparatus, classified in class 455, subclass 522.
 - II. Claims 8 –13 are drawn to digital broadcasting receiver, classified in class 455, subclass 3.01.
 - III. Claims 18 – 20, 21 – 23, 28, 29, 36, and 37 are drawn to digital broadcasting satellite transceivers, classified in class 455, subclass 12.1.
 - IV. Claims 14 – 17, 26, and 27 are drawn to a transmission posting apparatus, classified in class 455, subclass 91.
 - V. Claims 30 – 35 are drawn to a state recognition system, classified in class 455, subclass 68.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Groups I, II, III, IV and V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the power control apparatus, digital broadcasting receiver, digital broadcasting transceiver, transmission posting apparatus, and state recognition system all could

Art Unit: 2684

have utility if used separately or in another system. The subcombinations have separate utility such as the power control apparatus and the state recognition system.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Jonathan Bowser (Reg. Number 54,574) on 15 June 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
